OSI Spain Installs Plant Deodorization System

New system in wastewater treatment plant improves air quality

Toledo, Spain, December 2, 2015 – Today OSI Food Solutions Spain installed a deodorization air system within its wastewater treatment plant to avoid any odor issues associated with the purification process.

The plant now safely exhausts air that has been treated with ultraviolet (UV) radiation and ozone.

This system is proving successful and supports OSI's vision to actively reduce our environmental impact and improve our environmental performance.

About OSI
